The licence key you send to your licensing agent has to be the same as the one that is included in the licence key list. Using e-mail is the quickest, safest way to send a licence key to your licensing agent. The licence key that you send to your licensing agent will be included in a licence notification sent to you by your licensing agent.Q: How to make use of string in a list I have a list with a string and a list of numbers in each string as shown below: a = ['-1.2', [1,2,3,4,5]] I want to create a list like: b = [('a', 1.2), ('b', 2.1), ('c', 3.2), ('d', 4.1), ('e', 5.1)] I have tried converting list-of-list to list but then when I do: list = list(map(lambda x:(k,v) for k,v in x)) it throws error: TypeError: 'type'
